

# File Sharing with MAC OSX 10.5

## Configure Shared Folders

Set Guest Account to access shared folders:

- Go to your **System Preferences** under the Apple menu.
- Click on **Accounts**. (You may need to click the lock symbol and type in your password to make changes.)
- Under **Guest Account**, check **Allow guests to log into this computer**.
- Check **Allow guests to connect to shared folders**.

Set shared folders:

- Click on **Sharing** under **System Preferences**.
- Check **File Sharing**.
- Click **Options**.
- Select **“Share files and folders using SMB.”**
- Here you can set which folders you would like to share (i.e. iTunes Music Folder).
- Click the **+**. This brings up the file browser. Choose your music folder and click **Add**.
- Be sure **Everyone** is set to read only.

## Play Shared Files

To access the folders you set on your NetWorks unit:

- Go to **Music Player**.
- Choose **Shared Folders**.
- Choose **Workgroup**.
- Choose **Macintosh**.
- Here you can choose the folders you set to share. If the folder only has unsupported file types (m4a, AIFF), NetWorks will think it is empty.

# File Sharing with MAC OSX 10.3 & 10.4

## Allow File Sharing

Set accounts to share:

- Go to your **System Preferences** under the Apple menu.
- Click on **Sharing**.
- Check **Windows Sharing**.
- Here you can set which accounts you would like to share.
- Click **Accounts**. This brings up a list of accounts on your computer. Check desired account and click **Done**.

Set account password:

- Click on **Accounts** under **System Preferences**.
- If you don't have a password set up already, click **Change Password**. Here you can set up a password for your account.
- Remember your **Short Name** and **Password**; you will need them in the next step.

## Configure the NetWorks Global Audio System

To access the folders you set on your NetWorks unit:

- While in **Music Player Mode**, press and hold **menu/select** until the menu come on the screen.
- Choose **MP Setup**.
- Choose **PC Settings**.
- Enter your **Short Name** and **Password** from the previous step.
- Go to **Music Player**.
- Choose **Shared Folders**.
- Choose **Workgroup**.
- Choose **Macintosh**.
- Here you can choose the folders you set to share. If the folder only has unsupported file types (m4a, AIFF), NetWorks will think it is empty.
